### **Initial Gators' Research On Astrologers**

#### by The Astro Investigators

Published on the web May 31, 2007 at The Astro Investigators' Web Site.

Copyright © 2007 Astro Investigators. World rights reserved.

For this research we have used timed natal charts of 320 astrologers born between 1602 and 1968 and known for their literary contributions to astrology or who are full-time practicing astrologers.

We used Air Software's Astro Investigator Research Software and analyzed placements of and aspects to the following points: Sun, Moon, Mercury, Venus, Mars, Jupiter, Saturn, Uranus, Neptune, Pluto, Chiron, Ceres, Pallas, Juno, Vesta, Ascendant, Mid Heaven, mean North Node, Vertex, East Point and Part of Fortune. We used the Placidus house system and modern rulerships. For major aspects we used a six degree orb, and for minor aspects we used a two degree orb.

Chi Squares are calculated using twenty randomly generated control groups.
