**By Alphee Lavoie and Debbie Corkindale**

## OUR RESEARCH

We tested hundreds of astrological events to determine if any are statistically significant. These lists represent those items that are for one particular chi-square test we performed. We also use the Z-test for smaller samples but chose chi-square for this data.

The columns represent:

- **Astrological Criteria:** one astrological event
- **Chi-Square:** the chi-square generated for this one event for the particular sample population used in this test
- **Probability %:** probability is a number expressing the chances that a specific event will occur
- **Results:** Often, meaning the event is occurs statistically frequently beyond all probability.
