

## Astrological Similarities of U.S. Presidents

By Alphee Lavoie, Published on Facebook 5/17/2016

I did a research using all the Presidents natal charts and ran them against the control group to find out the correlation that they have astrologically. I tested over 400 astrological criteria then I used AIR Software Neural Net Program to create an artificial intelligence model giving weights depending on how strong each criteria was. Then I sent the natal charts of 4 presidential candidates through the artificial intelligence to see how they compare with the past United States Presidents. This is shown in the first picture. The second picture shows some of the important astrological criteria that the past presidents have in common showing the chi-square and the profitability of those criteria.
